

Scope/Usage

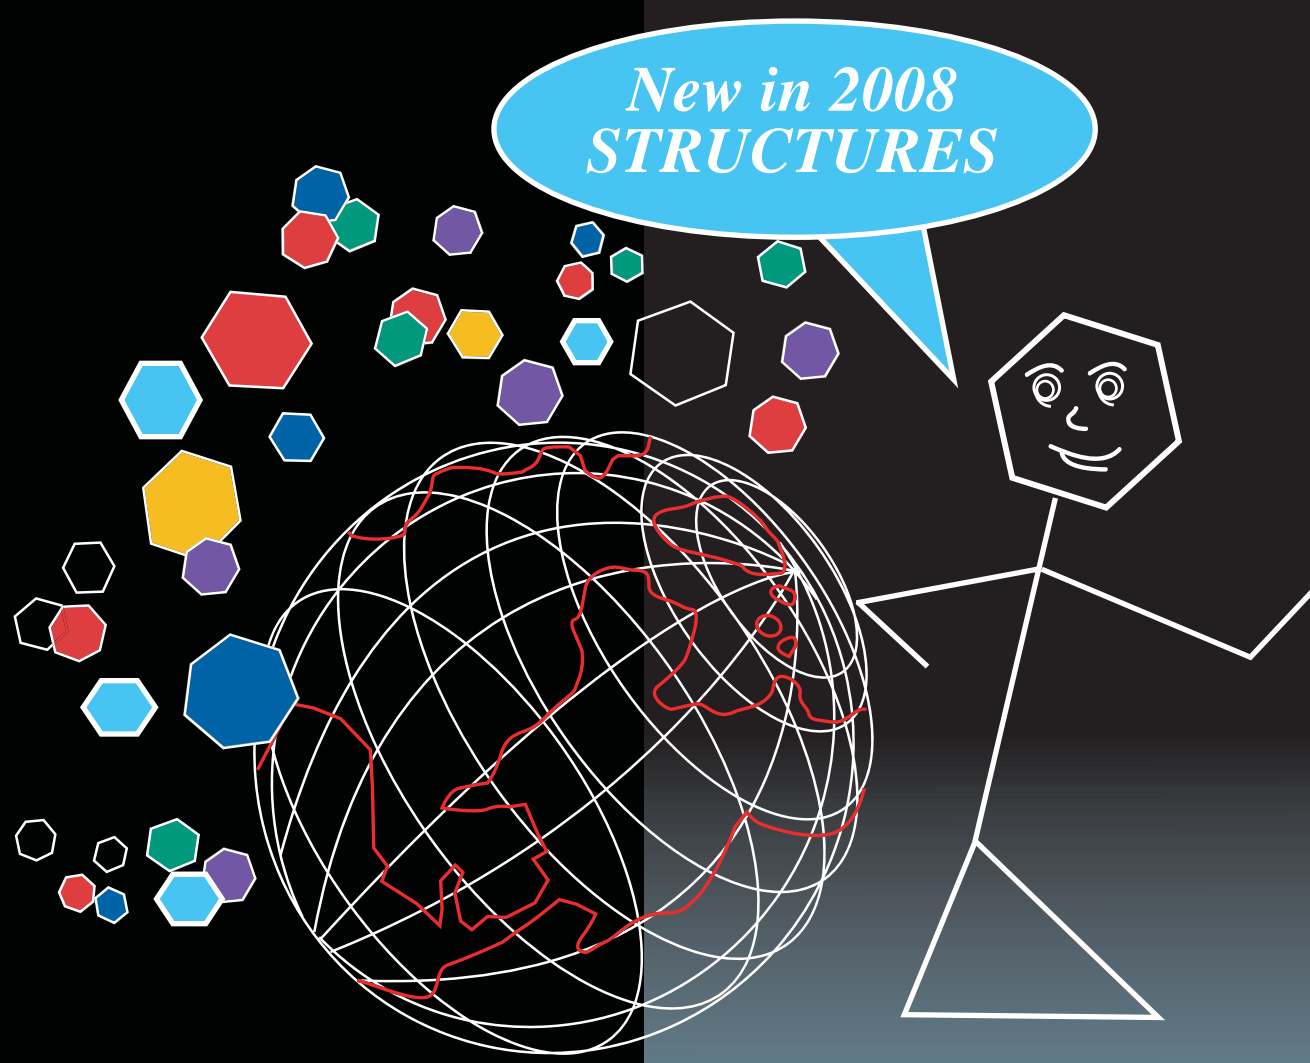

- *Over 63,000 unique structure diagrams*
- *Cross referenced with the DWCP's*
 - 202,000 product titles
 - 108,000 synonyms
- *View diagrams in multiple modes:*
 - Ball & Stick
 - 2D & 3D rotation
 - Spacefill
 - plus many more options.

Coverage

- *Bulk pharmaceuticals*
- *Fine & specialty chemicals*
- *Intermediates*
- *Organic and inorganic chemicals*
- *Dyes and dye intermediates*
- *Agricultural chemicals*
- *Food ingredient chemicals*
- *Flavor and fragrance chemicals*
- *Cosmetic chemicals*
- *Laboratory chemicals & reagents*
- *Catalysts (by general application categories)*
- *Resins (by general categories)*

Search By:

- *Sub Structure / Functional Group*
- *Structure Similarity*
- *Exact Structure Match*
- *Molecular Formula*
- *CAS registry number*
- *Chemical Name*

Chemical Information
Services

When you are searching for a chemical with a specific structure or functional group, *Structure: Search & Sketch* is the tool you need! We've combined the search power and breadth of the DWCP with more than 63,000 structure diagrams. When chemical structure is important to your work, you need a resource that is:

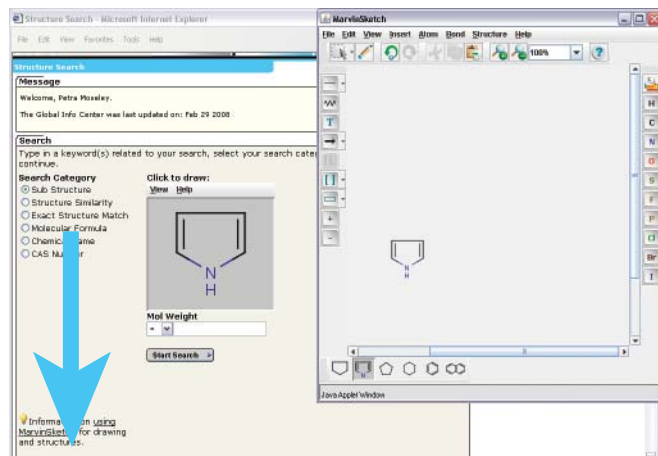

- User Friendly
- Comprehensive
- Accurate

With more than 35 years of experience providing worldwide chemical sourcing information, Chemical Information Services brings you even more detailed searching capability with the addition of *Structure: Search & Sketch*.

Structure: Search & Sketch is accessible on the Internet by subscription and is updated daily. US\$995 for 1 year subscription

To place an order or for more information, contact us at:

Search by structure.

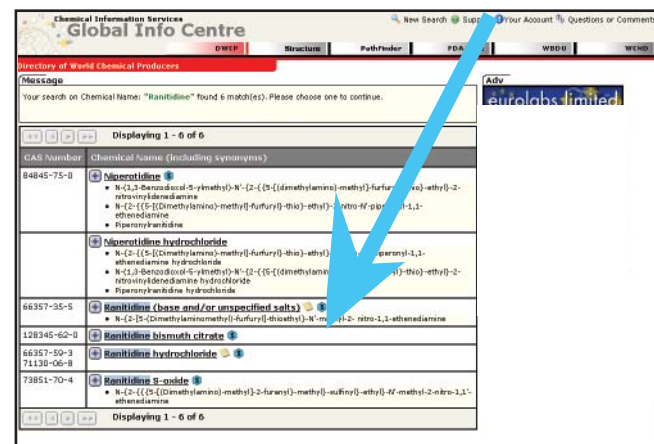

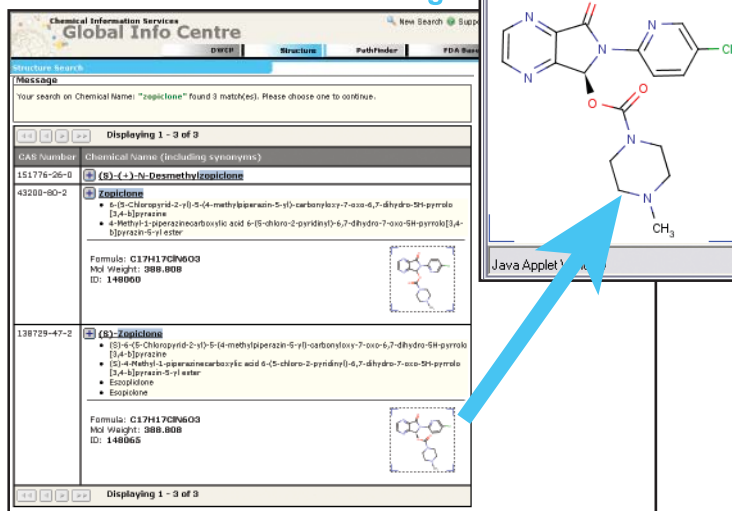

Finding what you are looking for has never been so simple. *Structure: Search & Sketch* can be searched by:

- *Sub Structure / Functional Group
- *Structure Similarity
- *Exact Structure Match
- *Molecular Formula
- *CAS registry number
- *Chemical Name

Within the DWCP, easily see when the structure is available.

Click on the structure to enlarge.

Viewing options include:

- Stick
- Spacefill
- Stereochemistry
- Absolute Stereo
- 2D & 3D Rotation
- Ball & Stick
- Lone Pairs
- Bond Length
- Atom Numbers
- and many more.
